

IGI Grades 3 Unique Creations, Including Largest To Date

27.27 carat and 20.24 carat lab grown diamonds are record-breakers

Mumbai, India. (May 25, 2022) – The International Gemological Institute (IGI), the world's largest independent gemological laboratory, has analyzed and graded 27.27 carat, 20.24 carat and 15.16 carat lab grown diamonds produced by Greenlab Diamonds LLP. Named in honor of the popular meditative expression Om Namah Shivaya, the 27.27 and 20.24 carat gemstones are the largest polished lab grown diamonds produced to date.

The 27.27 carat marquise step cut, named Om, has dimensions of 34.46 x 18.21 x 5.27 mm. According to the producer, it represents a vision to make India the world leader in the lab grown diamond sector. Om has the additional distinction of finishing "as-grown," needing no post-growth treatment to enhance color. Namah is a 15.16 carat pear rose cut measuring 24.52 x 15.60 x 4.56 mm, also finishing "as-grown." Shivaya is a 20.24 carat emerald cut, now the world's second largest polished lab grown diamond, measuring 22.17 x 10.93 x 7.26 mm. JCK Las Vegas attendees will find all three diamonds on display at the Greenlab Diamonds booth, #8131.

"We are committed to cultivating better diamonds; sustainable and affordable luxury that nurtures people and the planet," stated Sanket Patel of Greenlab Diamonds. "IGI has been our certifying partner from the very beginning and their advanced technology and research pursuits are commendable."

About IGI

The International Gemological Institute (IGI) has 20 laboratories and 14 education facilities in major diamond and jewelry centers around the world. For 45 years, IGI has provided the fine jewelry community and consumers with a broad range of services including natural and laboratory grown diamond reports, colored stone grading and origin reports, as well as jewelry identification and appraisal reports. With the increase of lab grown diamonds in the marketplace, IGI screens millions of natural and lab grown diamonds in order for the industry and consumers to receive the product they expect. Regardless of location or marketplace, an authentic IGI Laboratory Report is the common language of trust and confidence in the gemological world.
